

Icarus Wings - © John Fleming

It's late and I know
You told me I should go
but I've come round here with a new idea
it's a seed I must sow
so open up your window
and let the night inside
and I'll show you my Icarus Wings

"Not for me that flying
up there with the birds"
that's what I always thought
ah but they're just words
If I just believe it
then it can all come true
cos I have Icarus Wings

When you come to me in my dreams
I'll remember these dark nights
but my heart needs the warm bright air
and to take this crazy flight

so goodbye my lover
you kept me close and safe
If I need to fall and fall and fall
Then I'll find out what that means
So watch me darling one
stare up to the sun
and I'll fly away
on my Icarus Wings
yeah I'll fly away
on my Icarus Wings
free flying away
on my icarus wings
